MEMORANDUM FOR: [REDACTED]

SUBJECT : Request for Procurement of Medical Kits for  
Certain Project AQUATONE Personnel

1. As a follow-up on our telephone conversation of yesterday, I would appreciate it if you were to see to the assembling of seven medical kits for certain select personnel of this Project in connection with a requirement known to you.

2. You will recall that we discussed the inclusion therein of a stronger sedative than the phenobarbital which was included in the original sample kits - one which would take effect sooner and leave the patient with less of a sedative hang-over. We also talked about the inclusion of codeine as anti-dysentery feature.

3. I would appreciate it if you would take a look at the kits [REDACTED] has constructed for us and make any other additions or subtractions you feel are in keeping with our basic concept; i.e., providing these individuals with a kit based upon a 7-day use expectancy.

4. I would appreciate it also if this order for 7 kits were to be in addition to the 2 samples which [REDACTED] has already made up for us. Our timing is such that we would appreciate receiving them by the end of this week, if at all possible.
